GUIDELINES FOR EXHIBITING CUT ROSES

1. Since stem and foliage is an important element in judging cut Roses, each Rose bloom should have sufficient foliage and stem length in proportion to the size of the Rose (i.e., at least one set of leaves and 8" minimum stem for larger Roses.)
2. Miniature Roses require the amount of stem and foliage to balance the size of the Rose.
3. Proper form for most Rose blooms occurs at the 1/3 to 1/2 open stages where their symmetrical unfolding of the petals will attain the most perfect phase of beauty.
4. Good, crisp, brilliant color without fading or blemishes is desirable.
5. Substance of Rose blooms is the freshness of the flower.
6. Size of Rose bloom should be typical of its variety.
7. Polyanthas should be displayed in sprays with several blooms and buds showing color per stem.
8. Stem and foliage should be clean and free from spray residues and mildew.
9. Single Roses should have no more than 5 – 12 petals per bloom.
10. Named Variety Exhibits are encouraged but **required** in all named classes. 5% will be added to overall score for educational value for Roses that are named.
11. Bloom cycle must consist of three stems showing cycle of bloom from a bud just unfurling to exhibition stage and freshly opened bloom.
12. No wedging except newspaper.

DIVISION 315 – MINIATURE GARDEN AND/OR DISH GARDEN, & TERRARIUM
